

Year 6 Newsletter

May 2025

Welcome back! Our main focus this month is the EDEXCEL exams. We will be sitting some more practice exams before the real thing at the end of the month. Good luck to everyone.

In the English lessons, we will have a unit test and then move on to a new unit in which we will learn about detective work. We will try to differentiate between formal and informal writing, as well as work on learning the tenses and how to use each one. The irregular past tenses and past participles need to be learnt.

In Maths we have to learn how to read coordinates and translate (move) shapes and reflect them. We will revise angles, multiplication and division, and sequences. We will also learn about ratios.

In Science we will complete the unit on reversible and irreversible

changes, and move on to Forces in air and water.

In Geography we will investigate planning issues and then transport,

looking into the advantages and disadvantages of each type.

In History we have moved into modern times and will investigate how life changed after the Second

World War. The pupils will have the opportunity to ask family members what they remember about life when they were growing up. It

is very difficult for these children to imagine a life without electronics!

Please impress upon your children the importance of being focused in the lessons; they cannot learn if they do not listen. A good night's sleep also helps them to concentrate. Good manners are also important in the classroom, and the lack of a good attitude creates tensions and disagreements.

As always, if you have any questions or concerns, please feel free to contact Ms Omeash and make an appointment.
